Every Intelligent Person Should Learn How to Write.

More than a million people are employed in the publishing business in the United States, and all of them "had to begin." They are dropping out every day, and some one must take their place. There must be writers for

The Newspapers Magazines Moving Pictures

They pay more for the same class of service than most of the professions. With a table, a chair, paper and a typewriter you can begin now; and you do not need to give up your present occupation or employment. Even if you do not wish to take up journalism as a profession, there is no better mental training than learning to write.

The man or woman who writes is automatically thrown in touch with the big people who are shaping the destiny of the state and the nation, and the big things that are taking place in the new development of the country.

The fundamentals are carefully and simply arranged in our Correspondence Course of Instruction. A Washington correspondent who has written for every class of publications during the past twenty-five years has arranged the work, and is in charge of the course. Money back if you are not satisfied.
